

ARCTIC INSTITUTIONS, TRANSPORT, ENTREPRENEURSHIP AND BLUE ECONOMY DISCUSSED AT 9TH ARCTIC FUTURES

A diverse collection of more than 180 Arctic residents and stakeholders gathered for the 9th annual [Arctic Futures Symposium](#) at the Residence Palace in Brussels on Wednesday 28 November.

The all-day event, organised annually by the International Polar Foundation in conjunction with a large network of Arctic stakeholders, serves as a public venue to discuss key Arctic issues in Brussels.

Topics of conversation

After a brief welcome from Member of the Belgian Polar Secretariat Piet Steel, the symposium began with opening keynote speeches from the EU's Ambassador at Large for the Arctic Marie-Anne Coninx, the [Sámi Council](#)'s EU Coordinator Elle Merete Omma, and several other prominent Arctic figures.

Following the keyntoe session, former US Ambassador to the [Arctic Council](#) and Current [Wilson Center Polar Institute](#) Fellow David Balton, along with [Arctic Institute](#) and [Nord University](#) Senior Researcher

Andreas Raspotnik led a panel discussion focusing on how well Arctic Institutions are meeting the needs of Arctic residents. Participants in the panel included Senior Arctic Officials from the Arctic Council nations, representatives from the Arctic Council Permanent Participant Organisations, and the European External Action Service.

In the afternoon, following a delicious lunch of fish sponsored by [Iceland Responsible Fisheries](#), a panel led by Senior Adviser for Northern Policies at [Finland's Ministry for Foreign Affairs](#), Harri Mäki-Reinikka, looked at current and proposed Arctic transport projects in the context of climate change and sustainable development, both within the Arctic and from the Arctic to the rest of the world.

This was followed by a session moderated by [Arctic Economic Council](#) Director Anu Fredrikson, which explored barriers entrepreneurs encounter, ways to overcome them, how to create an entrepreneurial culture, and how to facilitate culture as a business in the Arctic. Of particular interest to conference-goers were representatives who could speak about indigenous culture as a source of entrepreneurial activity in the Arctic, including Anne Lajla Utsi CEO of the [International Sámi Film Institute](#), and Sandra Márjá West, Director of the annual [Riddu Ri?u Festival](#) in northern Norway.

The final session of the day, led by Andreas Østhagen, also from the [Arctic Institute](#) and [Nord University](#), discussed the challenges we face when exploring the blue economy's potential, not only in the Arctic, but also more generally, and how to go about governing blue economy activities. Following a raffle drawn by speaker Hayley Henning from [Greenland Ruby A/S](#) and Ambassador Marie-Anne Coninx in which a free Greenland Ruby brooch was given away, the symposium closed with remarks from the City of Tromsø's Arctic Ambassador, Kirsti Methi, and Deputy Secretary General for Economic and Global Issues at the [European External Action Service](#), Christian Leffler.

Bringing the Arctic to Brussels

The International Polar Foundation would like to thank its sponsors, the [Brussels Capital Region](#) and the [Pink Polar Bear Foundation](#), for helping to support the symposium.

We would also like to give thanks to the symposium's [network of partners](#), which includes the many Nordic regional offices and embassies of many Arctic states in Brussels. As representatives of the Arctic in Brussels, they play a major role in forming the symposium's programme each year.

A report highlighting salient points discussed during the symposium will be published in the coming weeks. Keep an eye on the [Arctic Futures Symposium website](#) for updates!
